iGesture Game Mode Guide

Configuring for Game Mode

- ✧ **iGesture Pad customers** must use the *Feature Selector* control panel in the *MultiTouch Utilities* to enable and configure Game Mode.
- ✧ On the iGesture Numpad, iGesture Mini, iGesture Keyboard, and iGesture Retro, the *config gesture*  lets you customize your unit by holding fingers in all four corners for 1 second. (Always do this in a text window to see resulting messages).
- ✧ Before using game mode the first time, you must , then press <Shift>G or Pause.
- ✧ Pinky key/button actions can be toggled off/on by , then touching *Period* (.) key.
- ✧ Both thumb and index triggers are always available--just use one base pointing chord or the other.

Entering and Leaving Game Mode

Activate Game Gestures

To activate game mode, press your palm heel on the center of the surface and slide them forward. The normal gesture set will be disabled and replaced with the game gestures shown below. Keys will be more responsive than normal but will not activate if more than one finger touches a surface half. **To restore normal operation, you must remember to reverse these gestures, pulling both palm heels toward you!**

Deactivate Game Mode

Point and Fire

Allows simultaneous control of the mouse pointer and pressing of fire buttons.

Thumb Trigger

 *Pointing Only*  *Pointing + Mouse1*
(left mouse button)  *Pointing + Mouse2*
(right mouse button)  *Pointing + Mouse1 + Mouse2*

Index Trigger

 *Pointing Only*  *Pointing + Mouse1*
(left mouse button)  *Pointing + Mouse2*
(right mouse button)  *Pointing + Mouse1 + Mouse2*

Additional Game Button Clicks

 *Wheel Up*  *Mouse3*

 *Mouse4*  *Mouse5*

 *Wheel Down*

General Gesturing Tips

For right click and other gestures that use the thumb, try to touch with the long, flat side of your thumb rather than its tip.

For right click and other gestures that use the thumb, keep the thumb spread a couple inches from the fingertips.

Avoid exaggerated hand rotation for gestures like *OPEN* and *CLOSE*. Start with a neutral hand position and slightly twist the fingertips.

General Pointing Tips

Feel free to use alternate fingertip pairs. Pointing can be done with any two adjacent fingertips excluding the thumb.

Relax. No need to press hard on the surface. A *light* touch works best.

Don't squeeze your fingertips together or spread them far apart. Keep them relaxed and slightly separated.

Holding suspended fingers too high is fatiguing. You can drop them on the surface *after* starting a point, drag, or scroll operation.

For fine scrolling, dragging, or pointing, *ROLL* your fingertips rather than slide them.
